

JoeXray LLC

JoeXray is proud to offer the 4pi EDS and Imaging capabilities to our product line, complementing our existing products to insure that all avenues for upgrading existing Electron Microscope and Microprobe systems are available and supported.

The 4pi product offering includes the following:

RevolutionEDX - EDX Systems & Upgrades for TEMs, SEMs, ESEMs & Microprobes. Full Feature X-ray Microanalysis, Digital Imaging, and interface to either new or existing SiLi or SDD detectors

RevolutionSEM - High resolution imaging for all SEMs and STEMs. The most versatile and useful imaging package available, with up to 14K x 14K resolution and selectable 8 to 16 bit pixel grey level depth

RevolutionTEM - 4pi's CCD camera systems for TEMs meet the demands of research and medical professionals: a simple, easy-to-use system for the acquisition of high-resolution, publication-quality digital images. 4pi combines its cross-platform intuitive software with cameras built by AMT -- a leading manufacturer of CCD cameras for TEMs.
